Experience

Sandeep Sawant Group

Feb 2026 - Present

Full Stack Developer (On-site)

Mumbai, Maharashtra

- Architected and delivered a full-stack real estate platform with an SEO-optimized property listing site, agent inquiry dashboard, and CMS-driven admin panel for managing properties, advisors, and static content pages.
- Built and deployed a production real estate platform with CMS, analytics, and advertisement management modules.

UnifyXperts

Aug 2025 - Oct 2025

Full Stack Developer Intern (On-site)

Mumbai, Maharashtra

- Contributed across multiple client projects, owning backend scripting, architecture replanning, and asynchronous workflow design using message queues and cron jobs.
- Integrated n8n-based automation pipelines to streamline repetitive business workflows and aligned backend decisions with cross-team performance goals.

Willow Institute

Mar 2025 - Aug 2025

Full Stack Developer (Remote)

Washington DC, USA

- Designed the backend architecture and database schema for Opus AI, an AI-powered health monitoring platform, and implemented RBAC (Role-Based Access Control) across the system.
- Built features across the Next.js frontend and Node.js/MongoDB backend, developing scalable, feature-based frontend code architectures.

SuperCeuticals Pvt. Ltd

Jul 2024 - Sept 2024

Full Stack Developer Intern (Remote)

Gurugram, Haryana

- Rebuilt the frontend using React.js following production-grade standards and developed optimized backend APIs with secure routing and consistent response structures.
- Built a role-based Admin Dashboard with granular access control and JWT-based authentication across customer-facing and internal application surfaces.

Projects

RAG API - Document Q&A System | FastAPI, Python, Vector DB, LLM, Hugging Face

- Built a RAG API with ingestion and query endpoints, extracting text from PDFs, generating embeddings with a Hugging Face model, and storing them in PostgreSQL via pgvector.
- Implemented the full embed-store-retrieve-generate pipeline end to end using FastAPI and SQLAlchemy, covering PDF text extraction, chunking, embedding generation, and context-aware prompt construction.

Code Reviewer - Multi-Agent Code Review CLI | Node.js, LangGraph.js, LangChain.js, Ollama, Simple-Git

- Built a multi-agent CLI tool using LangGraph with orchestrator, reviewer, and retriever agents sharing common long-term context memory, with real-time logging of active agent and tool calls, to answer project-specific code questions via @projectname references.
- Designed a RAG pipeline using HNSWLib to embed configured project folders into a local vector store on setup, with the retriever prioritizing vector search and falling back to Git and filesystem tools for live file access, re-embedding files when changes are detected.

Technical Skills

AI Tools: Claude Code, Cursor, Google Antigravity, N8N, MCP

Languages: JavaScript, Python, C, C++

Frontend: React.js, Next.js, Tailwind CSS, Redux, React Native

Backend: Node.js, Express.js, Django, Django REST Framework, Flask, FastAPI

Databases: MongoDB, PostgreSQL, MariaDB

DevOps & Cloud: Docker, AWS S3, Git, GitHub, Linux, Render, Vercel, Kubernetes, Microsoft Azure

Education

Terna Engineering College, Navi Mumbai

Nov 2022 – May 2026

Bachelor of Engineering in Mechatronics Engineering

CGPA - 7.5
